

110/ 240v Tent light

LIGHT OUTPUT:	8,200 LUMEN NET 9,450 "Total Initial Lumen" (sum of bulb ratings) other brands use this method
BULBS:	(3) 40 WATT, COMPACT FLUOR. LAMPS 20,000 HRS LAMP LIFE, >80 CRI
BALLAST: (flicker free)	100% SOLID STATE, HIGH POWER FACTOR, CLASS P, >25KHZ
VOLTS:	Universal Volt, 100 to 300 VOLT 50/60 HZ (automatically adjusts to any Volt/Hz)
AMP:	0.8 AMP (@ 120 Volt), to 0.35 AMP (@ 277 Volt)
SUB ZERO START TEMP:	STARTS BELOW 0 DEG F. (BELOW -20 DEG C)
TYPICAL WATT:	90 WATTS
WEIGHT	9 LBS (10 LBS including 15 ft Male cord & 0.5 ft Female cord)
LENGTH/ DIAMETER	LENGTH: 3 FT, 3 INCH / DIAMETER: 4 INCH SHELL, 5 INCH END CAPS
CORD:	15ft male & 0.5 ft female (18ft span w/ light) SJOOW OIL/CHEM. RESIST. CORD
UL listed for Wet Locations: LIGHT BODY & ALL EXTERIOR PARTS ARE SEALED & WATERPROOF	

HIGH LIGHT OUTPUT:

Puts out over three times the light of a conventional single (4 ft.) lamp fluorescent work light yet is much shorter and lighter weight than just one conventional unit.

HIGH EFFICIENCY:

The B6700M achieves 75% higher energy efficiency over conventional fluorescent work lights by using a 100% solid state ballast combined with high efficiency bulbs. Reduced energy consumption will reduce heat generated and therefore reduce the heat infrared signature. Savings in fuel and generator lifetime will more than pay for the entire light within a few months of usage.

PORTABLE:

B6700M weighs much less than even just a single conventional (4 ft.) bulb unit.

RUGGED:

The light uses a tough aluminum frame and is encased in a virtually indestructible polycarbonate shell (aircraft window plastic). Synthetic rubber end caps absorb shocks and protect switch and cord from damage. Switch is waterproof. Entire Light is sealed and UL listed for Wet Location Use. The ballast will self regulate over wide extremes of temperature and voltage. Lamps are cushioned with shock absorbing lamp holders; The B6700 will survive almost any accidental drop.

ERGONOMIC:

The lights can be plugged together to form a string of lights, and in addition, each light comes with a choice of fully adjustable snap-buckle or Velcro strapping for rapid setup. No maintenance is required for years
